

THE TRAINING PROTOCOL

**THE STEP-BY-STEP SYSTEM
FOR MAXIMUM RESULTS.**

R O H A N G U P T A

HOW TO USE THIS BOOK FOR FAT LOSS

If you're holding this book with a fat loss goal in mind, I want you to understand something from the start. This program is not built to exhaust you, it's built to guide you. The workout splits inside this book are designed to preserve muscle, improve strength, and keep your metabolism active. Your role is to apply them in a way that encourages your body to let go of fat while holding onto lean muscle.

The first decision you'll make is choosing a split that honestly fits your lifestyle. A 3-day split works beautifully for those with busy schedules or anyone just getting started. A 4-day split offers a strong balance between results and recovery. The 5- or 6-day splits are there for those who truly have the time and recovery to support them. There is no "best" split on paper, only the one you can follow consistently in real life

For fat loss, cardio becomes your partner. After each workout, spend about 20-25 minutes on moderate cardio: incline walking, cycling, or the stair machine all work well. This isn't about punishing yourself; it's about creating a steady calorie burn that supports your training. Done right, cardio helps you lose fat without sacrificing muscle.

Inside your lifting sessions, your focus should be control and quality. You don't need to chase failure on every set. Stopping one or two reps before failure keeps your recovery intact and your performance stable. Shorter rest periods, controlled tempo, and good form will take you much further than rushing through workouts.

Outside the gym, simple movement matters more than people realize. Daily steps add up. Walking more throughout the day quietly increases your calorie burn without stressing your body. Many successful fat loss journeys are built on these small, repeatable actions.

As the weeks go by, your goal isn't to lift heavier at all costs, it's to maintain your strength as much as possible. When your strength holds steady during a fat loss phase, it's a strong sign that your muscle is being preserved. And muscle is what gives the body that firm, toned look most people are after.

Finally, respect recovery. Fat loss doesn't reward burnout. If fatigue builds up, adjust your volume slightly but keep showing up. A well-recovered body performs better, and a body that performs well loses fat more efficiently.

This book gives you the structure. Your patience and consistency bring it to life. Fat loss isn't about doing everything, it's about doing the right things long enough to see them work.

MEN

HOME WORKOUT PROGRAM

Goal: Build strength, lose fat, improve fitness

Equipment: Bodyweight only

Frequency: 4 days / week

Duration: 30-40 minutes

Level: Absolute beginner

WEEKLY STRUCTURE

Day 1 : Full Body (A)

Day 2 : Cardio + Core

Day 3 : Rest / Mobility

Day 4 : Full Body (B)

Day 5 : Conditioning

Day 6-7 : Rest

4-WEEK PROGRESSION PLAN

Week	Progression
Week 1	Learn movements
Week 2	Add 2 reps per exercise
Week 3	Add 1 extra set
Week 4	Increase tempo or reduce rest

DAY 1 – FULL BODY (A)

Exercise	Sets × Reps
Bodyweight Squats	3 × 12
Incline Push-Ups (wall/bench)	3 × 8-10
Chair Rows / Towel Rows	3 × 10
Standing Shoulder Taps	2 × 20 taps
Plank	3 × 20-30 sec

DAY 2 – CARDIO + CORE

Exercise	Time / Reps
Marching in Place / Brisk Walk	5 min
Jumping Jacks	3 × 30 sec
High Knees (Low Impact)	3 × 30 sec
Mountain Climbers (Slow)	2 × 20
Dead Bug	3 × 10
Seated Stretching	5 min

DAY 4 – FULL BODY (B)

Exercise	Sets × Reps
Reverse Lunges	3 × 8 / leg
Knee Push-Ups	3 × 6-8
Glute Bridges	3 × 12
Pike Push-Ups (Shoulders)	2 × 6-8
Side Plank	2 × 20 sec / side

DAY 5 – CONDITIONING

Exercise	Format
Bodyweight Squats	30 sec
Push-Ups	30 sec
Jumping Jacks	30 sec
Mountain Climbers	30 sec
Rest	60 sec

BEGINNER RULES

1. Train slow and controlled
2. Rest 60-90 sec between sets
3. Stop 2-3 reps before failure
4. Focus on form > speed
5. Mild soreness is okay, pain is not

RETURN-TO-GYM WORKOUT SPLIT (RE-CONDITIONING PHASE)

This program is for those who have trained before but are returning after a long break. Your body remembers the gym, but it needs time to adapt again. This phase focuses on rebuilding strength, movement control, and confidence without rushing or risking injury. It's the smart bridge between starting again and training hard again.

Goal: Rebuild strength, regain fitness, prevent injury

Equipment: Full gym access

Frequency: 4 days / week

Duration: 45-60 minutes

Level: Returning after long break (4+ weeks)

WEEKLY STRUCTURE

Day 1: Upper Body (Push Focus)

Day 2: Lower Body (Quad Focus)

Day 3: Rest / Mobility

Day 4: Upper Body (Pull Focus)

Day 5: Lower Body (Hip + Hamstrings)

Day 6-7: Rest / Light activity

DAY 1 – UPPER BODY (PUSH RE-INTRODUCTION)

Exercise	Sets × Reps
Dumbbell Bench Press	3 × 10
Incline Machine / DB Press	2 × 12
Seated Dumbbell Shoulder Press	2 × 10
Cable Lateral Raises	2 × 15
Triceps Pushdown	2 × 12

DAY 2 – LOWER BODY (QUAD-DOMINANT)

Exercise	Sets × Reps
Goblet Squat	3 × 10
Leg Press	3 × 12
Seated Leg Curl	2 × 12
Standing Calf Raises	3 × 15
Optional Core: Plank	2 × 30-40 sec

DAY 4 – UPPER BODY (PULL RE-INTRODUCTION)

Exercise	Sets × Reps
Lat Pulldown	3 × 10
Chest-Supported Row	3 × 12
Face Pulls	2 × 15
Dumbbell Bicep Curls	2 × 12
Hammer Curls	1-2 × 12

DAY 5 – LOWER BODY (HIP + POSTERIOR CHAIN)

Exercise	Sets × Reps
Romanian Deadlift (Light)	3 × 8
Walking Lunges	2 × 10 / leg
Hip Thrust (Machine/Barbell)	2 × 12
Seated Calf Raises	3 × 15
Optional Core: Dead Bug	2 × 10

NON-NEGOTIABLE RULES

Rule	Why it matters
Start at 60-65% of old strength	Nervous system needs re-adaptation
Leave 3 reps in reserve	Prevents DOMS & injury
No failure sets	Tendons lag behind muscles
Slow tempo	Rebuilds control
48 hrs rest per muscle	Recovery > volume

BRO SPLIT - BEGINNER

This split is for someone who is new to structured training and wants a simple, focused way to start building muscle. Instead of training everything at once, each workout targets one major muscle group, making sessions easier to follow and less mentally overwhelming.

For beginners, this approach helps you learn proper exercise form, build a strong mind-muscle connection, and recover well between workouts. It's straightforward, motivating, and ideal for creating consistency in the early stages of your fitness journey.

Goal: Build muscle, learn form, create consistency

Equipment: Full gym access

Frequency: 5 days / week

Duration: 45-60 minutes

Level: Beginner (0-6 months of training)

WEEKLY STRUCTURE

Day 1: Chest

Day 2: Back

Day 3: Shoulders

Day 4: Arms (Biceps + Triceps)

Day 5: Legs

Day 6-7: Rest / Active recovery

DAY 1 – CHEST

Exercise	Sets × Reps
Barbell Bench Press	3 × 8-10
Incline Dumbbell Press	3 × 10
Dumbbell Chest Fly	2 × 12
Push-Ups (Optional Finisher)	2 × AMRAP

DAY 2 - BACK

Exercise	Sets × Reps
Lat Pulldown	3 × 10
Seated Cable Row	3 × 12
One-Arm Dumbbell Row	2 × 10 / arm
Straight-Arm Pulldown	2 × 12

DAY 3 - SHOULDERS

Exercise	Sets × Reps
Seated Dumbbell Shoulder Press	3 × 10
Dumbbell Lateral Raises	3 × 15
Front Raises	2 × 12
Rear Delt Fly (Machine/DB)	2 × 15

DAY 4 – ARMS (Biceps + Triceps)

Exercise	Sets × Reps
Barbell Curl	3 × 10
Dumbbell Hammer Curl	2 × 12
Triceps Pushdown	3 × 12
Overhead Dumbbell Extension	2 × 12

DAY 5 – LEGS

Exercise	Sets × Reps
Back Squat	3 × 8–10
Leg Press	3 × 10
Lying Leg Curl	2 × 12
Standing Calf Raises	3 × 15

8-WEEK PROGRESSION PLAN

Week	Progression Focus
Week 1	Learn exercises, light weights, perfect form
Week 2	Add 1-2 reps per set
Week 3	Increase weight slightly (2-5%)
Week 4	Maintain weight, improve control and tempo
Week 5	Add 1 extra set to main exercises
Week 6	Increase weight again (2-5%)
Week 7	Push closer to failure (1-2 reps in reserve)
Week 8	Deload week: reduce volume, focus on recovery

3 DAY SPLIT - BEGINNER

This split is designed for absolute beginners or anyone who wants a simple, low-stress entry into training. If you're new to the gym, short on time, or want steady progress without training every day, this structure works best. It allows enough recovery between sessions while still training the full body consistently. This is the safest and most sustainable way to build strength, confidence, and discipline in the early stages of fitness.

Goal: Build full-body strength, create training consistency

Equipment: Full gym access

Frequency: 3 days / week

Duration: 45-60 minutes

Level: Beginner (0-6 months of training)

WEEKLY STRUCTURE

Day 1: Lower Body

Day 2: Rest

Day 3: Upper Body

Day 4: Rest

Day 5: Full Body

Day 6-7: Rest / Active recovery

Day 1 - Lower Body

Exercise	Sets × Reps
Back Squat	3 × 8-10
Leg Press	3 × 10-12
Lying Leg Curl	2 × 12
Standing Calf Raises	3 × 15

Day 3 - Upper Body

Exercise	Sets × Reps
Barbell Bench Press	3 × 8
Lat Pulldown	3 × 10
Seated Dumbbell Shoulder Press	2 × 10
Seated Cable Row	2 × 12
Triceps Pushdown	2 × 12
Dumbbell Curls	2 × 12

Day 5 - Full Body

Exercise	Sets × Reps
Romanian Deadlift	3 × 8
Incline Dumbbell Press	3 × 10
Walking Lunges	2 × 10 / leg
Seated Cable Row	2 × 12
Plank	3 × 30 sec

8-WEEK PROGRESSION PLAN

Week	Progression Focus
Week 1	Learn movements, light weights
Week 2	Add 1-2 reps per exercise
Week 3	Increase weight slightly (2-5%)
Week 4	Maintain weight, improve form and control
Week 5	Add 1 extra set to main lifts
Week 6	Increase weight again (2-5%)
Week 7	Train closer to failure (1-2 reps in reserve)
Week 8	Deload: reduce volume, focus on recovery

3 DAY SPLIT - INTERMEDIATE

This split is for trainees who already have a solid foundation and want to continue progressing without increasing training days. It suits those who lift consistently but need more structured volume and intensity than a beginner plan while still allowing enough recovery to grow stronger week after week.

Goal: Build strength and muscle, improve performance

Equipment: Full gym access

Frequency: 3 days / week

Duration: 60-75 minutes

Level: Beginner (6-18 months of consistent training)

WEEKLY STRUCTURE

Day 1: Lower Body

Day 2: Rest

Day 3: Upper Body

Day 4: Rest

Day 5: Full Body

Day 6-7: Rest / Active recovery

Day 1 - Lower Body

Exercise	Sets × Reps
Back Squat	4 × 6-8
Romanian Deadlift	3 × 8-10
Leg Press	3 × 10
Seated Leg Curl	3 × 12
Standing Calf Raises	4 × 15

Day 3 - Upper Body

Exercise	Sets × Reps
Barbell Bench Press	4 × 6-8
Lat Pulldown	3 × 8-10
Seated DB Shoulder Press	3 × 8-10
Chest-Supported Row	3 × 10
Triceps Pushdown	3 × 12
Dumbbell Curls	3 × 12

Day 5 - Full Body

Exercise	Sets × Reps
Deadlift	3 × 5
Incline DB Press	3 × 8-10
Walking Lunges	3 × 10 / leg
Seated Cable Row	3 × 10
Hanging Leg Raises	3 × 12

12-WEEK PROGRESSION PLAN

Phase / Week	Progression Focus
Weeks 1-2	Re-establish working weights, clean execution
Weeks 3-4	Add reps within target ranges
Weeks 5-6	Increase load by 2.5-5%
Week 7	Maintain load, focus on tempo and control
Weeks 8-9	Add volume to main lifts (extra set)
Weeks 10-11	Push intensity (1-2 reps in reserve)
Week 12	Deload: reduce volume and intensity

4 DAY WORKOUT SPLIT - BEGINNER

This split is ideal for someone who has moved past the very early stage and is ready to train more frequently without overwhelming recovery. It suits beginners who can commit four days a week and want better muscle balance, improved strength, and clearer structure than a 3-day plan while still keeping workouts manageable.

Goal: Build strength and muscle, improve work capacity

Equipment: Full gym access

Frequency: 4 days / week

Duration: 60 minutes

Level: Beginner (3-9 months of training experience)

WEEKLY STRUCTURE

Day 1: Upper Body

Day 2: Lower Body

Day 3: Rest

Day 4: Upper Body

Day 5: Lower Body

Day 6-7: Rest / Light activity

Day 1 - Upper Body

Exercise	Sets × Reps
Barbell Bench Press	3 × 8
Lat Pulldown	3 × 10
Dumbbell Lateral Raises	2 × 15
Triceps Pushdown	2 × 12
Dumbbell Curls	2 × 12

Day 2 - Lower Body

Exercise	Sets × Reps
Back Squat	3 × 8
Leg Press	3 × 10
Lying Leg Curl	2 × 12
Standing Calf Raises	3 × 15

Day 3 - Upper Body

Exercise	Sets × Reps
Incline DB Press	3 × 10
Seated Cable Row	3 × 12
Dumbbell Shoulder Press	2 × 10
EZ-Bar Curl	2 × 12
Overhead Triceps Extension	2 × 12

Day 4 - Lower Body

Exercise	Sets × Reps
Romanian Deadlift	3 × 8
Goblet Squat	3 × 12
Walking Lunges	2 × 10 / leg
Seated Calf Raises	3 × 15

8-WEEK PROGRESSION PLAN

Week	Progression Focus
Week 1	Learn structure, moderate weights
Week 2	Add 1-2 reps per set
Week 3	Increase load slightly (2-5%)
Week 4	Maintain weight, improve form
Week 5	Add 1 extra set to main lifts
Week 6	Increase load again (2-5%)
Week 7	Train closer to failure (1-2 reps in reserve)
Week 8	Deload: reduce volume and intensity

4 DAY WORKOUT SPLIT - INTERMEDIATE

This split is built for trainees who have outgrown beginner programs and need more structured volume and intensity, while still respecting recovery. It's ideal if you train consistently, understand basic lifts, and want steady strength and muscle gains without moving to very high weekly frequency.

Goal: Build lean muscle, increase strength, improve training volume tolerance

Equipment: Full gym access

Frequency: 4 days / week

Duration: 60-75 minutes

Level: Beginner (6-18 months of consistent training)

WEEKLY STRUCTURE

Day 1: Upper Body - A

Day 2: Lower Body - B

Day 3: Rest / Active recovery

Day 4: Upper Body - B

Day 5: Lower Body - B

Day 6-7: Rest

Upper Body - A

Exercise	Sets × Reps
Barbell Bench Press	4 × 6-8
Lat Pulldown	3 × 8-10
Chest-Supported Row	3 × 10
Lateral Raises	3 × 15
Triceps Pushdown	3 × 12

Lower Body - A

Exercise	Sets × Reps
Back Squat	4 × 6-8
Leg Press	3 × 10
Leg Curl	3 × 12
Standing Calf Raises	4 × 15

Upper Body - B

Exercise	Sets × Reps
Incline DB Press	4 × 8
Seated Cable Row	3 × 10
Seated DB Shoulder Press	3 × 8
EZ-Bar Curl	3 × 12
Overhead Triceps Extension	3 × 12

Lower Body - B

Exercise	Sets × Reps
Romanian Deadlift	4 × 8
Walking Lunges	3 × 10 / leg
Leg Extension	3 × 12
Seated Calf Raises	4 × 15

12-WEEK PROGRESSION PLAN

Phase / Week	Progression Focus
Weeks 1-2	Establish working weights, refine technique
Weeks 3-4	Increase reps within prescribed ranges
Weeks 5-6	Add load (2.5-5%) to main lifts
Week 7	Maintain load, improve tempo and control
Weeks 8-9	Add volume (extra set on compound lifts)
Weeks 10-11	Push intensity (1-2 reps in reserve)
Week 12	Deload: reduce volume and intensity

5 DAY WORKOUT SPLIT - INTERMEDIATE

This split is designed for trainees who already have a solid training base and are ready for higher weekly volume without sacrificing recovery. It works best if you enjoy training most days of the week, understand exercise execution, and want balanced muscle growth with clear structure.

Goal: Build lean muscle, increase strength, improve weekly training volume

Equipment: Full gym access

Frequency: 5 days / week

Duration: 60-75 minutes

Level: Beginner (9-24 months of consistent training)

WEEKLY STRUCTURE

Day 1: Push

Day 2: Pull

Day 3: Legs

Day 4: Upper Body (Back-Dominant)

Day 5: Lower Body (Hamstrings focus)

Day 6-7: Rest / Active recovery

Day 1 – Push

Exercise	Sets × Reps
Barbell Bench Press	4 × 6-8
Incline Dumbbell Press	3 × 8-10
Seated Shoulder Press	3 × 8-10
Dumbbell Lateral Raises	3 × 15
Triceps Pushdown	3 × 12

Day 2 – Pull

Exercise	Sets × Reps
Barbell Deadlift	3 × 5
Lat Pulldown	3 × 8-10
Seated Cable Row	3 × 10
Face Pulls	3 × 15
Dumbbell Curls	3 × 12

Day 3 – Legs

Exercise	Sets × Reps
Back Squat	4 × 6-8
Leg Press	3 × 10
Leg Curl	3 × 12
Standing Calf Raises	4 × 15

Day 4 – Upper (Back-Dominant)

Exercise	Sets × Reps
Incline Bench Press	3 × 8
One-Arm Dumbbell Row	3 × 10
Lat Pulldown	3 × 10
Dumbbell Lateral Raises	3 × 15
Arms Superset	2 × 12

Day 5 – Lower (Hamstring Focus)

Exercise	Sets × Reps
Romanian Deadlift	4 × 8
Walking Lunges	3 × 10 / leg
Leg Extension	3 × 12
Seated Calf Raises	4 × 15

12-WEEK PROGRESSION PLAN

Phase / Week	Progression Focus
Weeks 1-2	Establish working weights, refine technique
Weeks 3-4	Increase reps within prescribed ranges
Weeks 5-6	Add load (2.5-5%) to main lifts
Week 7	Maintain load, improve tempo and control
Weeks 8-9	Add volume (extra set on compound lifts)
Weeks 10-11	Push intensity (1-2 reps in reserve)
Week 12	Deload: reduce volume and intensity

5 DAY WORKOUT SPLIT - ADVANCED

This split is built for experienced lifters who already understand their body, recovery limits, and training intensity. It's meant for those who want maximum weekly volume and precision, and who can recover well while training hard most days of the week. This is no longer about learning exercises, it's about executing them with intent.

Goal: Maximize muscle hypertrophy, push strength progression, refine physique

Equipment: Full gym access

Frequency: 5 days / week

Duration: 75-90 minutes

Level: Advanced (2+ years of consistent, structured training)

WEEKLY STRUCTURE

Day 1: Push (Chest & Shoulders Emphasis)

Day 2: Pull (Back Thickness & Width)

Day 3: Legs (Quad Dominant)

Day 4: Upper Body (Accessory & Weak-Point Focus)

Day 5: Lower Body (Hamstrings & Glutes)

Day 6-7: Rest / Active recovery

Day 1 – Push

Exercise	Sets × Reps
Barbell Bench Press	5 × 5
Incline Dumbbell Press	4 × 8
Seated Shoulder Press	4 × 8
Dumbbell Lateral Raises	4 × 15
Overhead Triceps Extension	3 × 12

Day 2 – Pull

Exercise	Sets × Reps
Deadlift	4 × 4
Weighted Pull-ups / Lat Pulldown	4 × 8
Barbell Row	4 × 8
Face Pulls	4 × 15
Barbell Curls	3 × 10

Day 3 – Legs

Exercise	Sets × Reps
Back Squat	5 × 5
Leg Press	4 × 10
Lying Leg Curl	4 × 12
Standing Calf Raises	5 × 15

Day 4 – Upper

Exercise	Sets × Reps
Incline Barbell Press	4 × 6
Chest-Supported Row	4 × 10
Dumbbell Shoulder Press	4 × 8
Superset: Curl + Pushdown	3 × 12

Day 5 – Lower (Hamstring Focus)

Exercise	Sets × Reps
Romanian Deadlift	5 × 6
Walking Lunges	3 × 12 / leg
Leg Extension	3 × 15
Seated Calf Raises	5 × 15

12-WEEK PROGRESSION PLAN

Phase / Week	Progression Focus
Weeks 1-2	Establish heavy working weights, clean execution
Weeks 3-4	Increase reps within target ranges
Weeks 5-6	Increase load by 2.5-5% on main lifts
Week 7	Volume hold, focus on tempo and control
Weeks 8-9	Add intensity techniques (top sets, back-off sets)
Weeks 10-11	Push near failure (0-1 reps in reserve)
Week 12	Deload: reduce volume, maintain movement quality

6-DAY SPLIT - INTERMEDIATE (PPL × 2)

This split is for lifters who already have a solid training base and want to train almost every day without turning sessions into chaos. It suits those who recover well, enjoy high frequency, and want to hit each muscle group twice per week for consistent growth and strength gains.

Goal: Build muscle and strength through higher training frequency

Equipment: Full gym access

Frequency: 6 days / week

Duration: 60-75 minutes

Level: Intermediate (9-24 months of consistent training)

WEEKLY STRUCTURE

Day 1: Push (A)

Day 2: Pull (A)

Day 3: Legs (A)

Day 4: Push (B)

Day 5: Pull (B)

Day 6: Legs (B)

Day 7: Rest / Active recovery

Push (A & B)

Exercise	Sets × Reps
Barbell Bench Press	4 × 6-8
Incline Bench Press	4 × 8
Seated Shoulder Press	3 × 8-10
Lateral Raises	3 × 15
Triceps Pushdown	3 × 12

Pull (A & B)

Exercise	Sets × Reps
Barbell Deadlift	3 × 5
Lat Pulldown	3 × 8-10
Seated Cable Row	3 × 10
Face Pulls	3 × 15
Dumbbell Curls	3 × 12

Legs (A & B)

Exercise	Sets × Reps
Back Squat	4 × 6-8
Romanian Deadlift	4 × 8
Leg Press	3 × 10
Leg Curl	3 × 12
Standing / Seated Calf Raises	4 × 15

12-WEEK PROGRESSION PLAN

Phase / Week	Progression Focus
Weeks 1-2	Establish working weights and movement efficiency
Weeks 3-4	Add reps within prescribed ranges
Weeks 5-6	Increase load by 2.5-5% on compound lifts
Week 7	Maintain load, focus on execution and tempo
Weeks 8-9	Increase volume (extra sets on key movements)
Weeks 10-11	Push intensity (1-2 reps in reserve)
Week 12	Deload: reduce volume and intensity

WOMEN

HOME WORKOUT SPLIT

Goal: Tone muscles, build strength, support fat loss

Equipment: Bodyweight, chair/sofa, optional dumbbells or bands

Frequency: 4 days/week

Duration: 30-45 minutes

Level: Beginner to early-intermediate

WEEKLY STRUCTURE

Day 1: Lower Body + Glutes

Day 2: Upper Body

Day 3: Rest / Walk / Mobility

Day 4: Lower Body + Core

Day 5: Full Body

Day 6-7: Rest / Light activity

4-WEEK PROGRESSION

Week	Progression
Week 1	Learn movements
Week 2	Add 2-3 reps per exercise
Week 3	Add 1 extra set
Week 4	Reduce rest time slightly

DAY 1 – LOWER BODY + GLUTES

Exercise	Sets × Reps
Bodyweight Squats	3 × 12-15
Glute Bridges	3 × 15
Reverse Lunges	3 × 10/leg
Donkey Kicks	2 × 15/leg
Wall Sit	2 × 30-40 sec

DAY 2 – UPPER BODY

Exercise	Sets × Reps
Knee or Full Push-ups	3 × 8-12
Chair Dips	3 × 10
Arm Circles	2 × 20
Dumbbell/Band Rows (or towel	3 × 12
Plank Shoulder Taps	2 × 20 taps

DAY 4 – LOWER BODY + CORE

Exercise	Sets × Reps
Step-ups (chair/bench)	3 × 12/leg
Sumo Squats	3 × 15
Glute Bridge Hold	2 × 30 sec
Leg Raises	3 × 12
Plank	3 × 30 sec

DAY 5 – FULL BODY

Exercise	Sets × Reps
Squats	3 × 15
Push-ups	3 × 10
Glute Bridges	3 × 15
Mountain Climbers	3 × 20
Plank	2 × 40 sec

SIMPLE GUIDELINES

1. Warm up 5 minutes (marching, arm swings, hip circles)
2. Rest 45-60 sec between sets
3. Focus on slow, controlled reps
4. Stop 1-2 reps before failure
5. Optional: 10-20 min walking for extra fat loss

3-DAY SPLIT WORKOUT – BEGINNER

This split is designed for women who are new to strength training or returning after a long break and want a routine that fits into real life. If your schedule is busy, energy fluctuates through the month, or you're worried about overtraining, this plan gives you structure without pressure. It allows enough recovery between sessions while still delivering visible strength, toning, and confidence gains.

What makes this split special is its balance. You train often enough to see progress, but not so much that fatigue, soreness, or hormonal stress builds up. It's simple, sustainable, and easy to stay consistent with exactly what beginners need.

Goal: Build strength, tone muscles, improve overall fitness

Equipment: Full gym access

Frequency: 3 days / week (alternate days)

Duration: 60 minutes (including warm-up and cardio)

Level: Beginner

WEEKLY STRUCTURE

Monday: Upper Body

Wednesday: Lower Body

Saturday: Full Body

Tuesday, Thursday, Friday, Sunday: Rest / light activity

MONDAY – UPPER BODY

Exercise	Sets × Reps
Lat Pulldown	3 × 10-12
Dumbbell Bench Press	3 × 10
Seated Cable Row	3 × 12
Dumbbell Shoulder Press	2 × 10
Dumbbell Lateral Raises	2 × 15
Triceps Rope Pushdown	2 × 12

WEDNESDAY – LOWER BODY

Exercise	Sets × Reps
Goblet Squat	3 × 12
Leg Press	3 × 10
Romanian Deadlift	3 × 10
Seated Leg Curl	2 × 12
Standing Calf Raises	3 × 15

SATURDAY – FULL BODY

Exercise	Sets × Reps
Hip Thrust (DB/Barbell)	3 × 12
Incline Dumbbell Press	3 × 10
Walking Lunges	2 × 10 / leg
Lat Pulldown	2 × 12
Plank	3 × 30-40 sec

PROGRESSION BASED ON FEMALE CYCLE

This progression respects natural energy and recovery changes across the menstrual cycle, helping women train smarter.

Cycle Phase	Days	Training Focus	How to Progress
Menstrual	1-5	Recovery & technique	Reduce weights by 10-20%, focus on form
Follicular	6-13	Strength & learning	Add reps or small weight increases
Ovulatory	14-16	Peak performance	Push heavier loads, best time for PRs
Luteal	17-28	Volume & control	Maintain weights, slow tempo, higher reps

4-DAY SPLIT WORKOUT – BEGINNER

This split is designed for women who have moved past the very first stage of training and are ready to train more frequently without overwhelming their body. If you already feel comfortable in the gym, can commit four days a week, and want more visible toning and strength this is the right next step.

What makes this split effective is balance. Each muscle group is trained twice per week, which improves muscle tone and strength, while built-in rest days protect recovery and hormone health. It's structured enough to see progress, yet flexible enough to fit real life.

Goal: Build strength, improve muscle tone, enhance body composition

Equipment: Full gym access

Frequency: 4 days / week

Duration: 50-60 minutes

Level: Beginner (3-9 months of training experience)

WEEKLY STRUCTURE

Monday: Upper Body

Tuesday: Lower Body

Wednesday: Rest / Mobility

Thursday: Upper Body

Friday: Lower Body

Saturday-Sunday: Rest / Light activity

UPPER BODY (A)

Exercise	Sets × Reps
Lat Pulldown	3 × 10
Dumbbell Bench Press	3 × 10
Seated Cable Row	3 × 12
Dumbbell Shoulder Press	2 × 10
Triceps Pushdown	2 × 12

LOWER BODY (A)

Exercise	Sets × Reps
Goblet Squat	3 × 12
Leg Press	3 × 10
Romanian Deadlift	3 × 10
Standing Calf Raises	3 × 15

UPPER BODY (B)

Exercise	Sets × Reps
Assisted Pull-ups / Pulldown	3 × 8-10
Incline DB Press	3 × 10
Chest-Supported Row	3 × 12
Lateral Raises	3 × 15
Dumbbell Curls	2 × 12

LOWER BODY (B)

Exercise	Sets × Reps
Hip Thrust	3 × 12
Walking Lunges	3 × 10 / leg
Seated Leg Curl	2 × 12
Seated Calf Raises	3 × 15

PROGRESSION BASED ON FEMALE CYCLE

This approach adjusts effort and progression to match natural hormonal shifts, helping beginners progress without burnout.

Cycle Phase	Days	Training Focus	How to Progress
Menstrual	1-5	Recovery & technique	Reduce load 10–15%, focus on form
Follicular	6-13	Strength building	Add reps or small weight increases
Ovulatory	14-16	Peak performance	Train slightly heavier, best energy
Luteal	17-28	Control & volume	Maintain weights, slower tempo

4-DAY SPLIT WORKOUT – INTERMEDIATE

This split is built for women who already have training experience and want better results from smarter structure, not just more effort. If you're consistent in the gym, understand basic lifts, and feel ready to handle slightly higher volume and intensity, this plan is for you.

What makes this split effective is frequency with control. Each muscle group is trained twice per week, which improves strength and muscle development, while planned rest days keep recovery and energy levels stable especially important as training stress increases at the intermediate stage.

Goal: Build lean muscle, increase strength, improve body shape

Equipment: Full gym access

Frequency: 4 days / week

Duration: 60-75 minutes

Level: Intermediate (9-24 months of consistent training)

WEEKLY STRUCTURE

Monday: Upper Body (A)

Tuesday: Lower Body (A)

Wednesday: Rest / Mobility

Thursday: Upper Body (B)

Friday: Lower Body (B)

Saturday-Sunday: Rest / Active recovery

UPPER BODY (A)

Exercise	Sets × Reps
Lat Pulldown	4 × 8-10
Barbell / DB Bench Press	4 × 8
Seated Cable Row	3 × 10
Dumbbell Shoulder Press	3 × 8
Triceps Pushdown	3 × 12

LOWER BODY (A)

Exercise	Sets × Reps
Back Squat	4 × 6-8
Leg Press	3 × 10
Romanian Deadlift	3 × 8-10
Standing Calf Raises	4 × 15

UPPER BODY (B)

Exercise	Sets × Reps
Assisted Pull-ups	4 × 8
Incline DB Press	3 × 8-10
One-Arm DB Row	3 × 10
Lateral Raises	3 × 15
Biceps Curls	3 × 12

LOWER BODY (B)

Exercise	Sets × Reps
Hip Thrust	4 × 10
Walking Lunges	3 × 12 / leg
Leg Curl	3 × 12
Seated Calf Raises	4 × 15

PROGRESSION BASED ON FEMALE CYCLE

This progression aligns training intensity with natural hormonal fluctuations to maximize performance and recovery.

Cycle Phase	Days	Training Focus	How to Progress
Menstrual	1-5	Technique & recovery	Reduce load by 10-20%, longer rest
Follicular	6-13	Strength & progression	Increase reps or load (2-5%)
Ovulatory	14-16	Peak strength	Push heavier sets, best time for PRs
Luteal	17-28	Volume & control	Maintain load, focus on tempo and form

5-DAY SPLIT WORKOUT – INTERMEDIATE

This split is designed for women who already train consistently and want to take their results to the next level. If you're comfortable in the gym, recover well, and can commit to training most days of the week, this plan allows you to apply more focused work to each muscle group without sacrificing balance.

What makes this split powerful is precision. Instead of rushing through full-body sessions, you give specific muscles the attention they need, which leads to better shape, strength, and definition especially in areas many women want to prioritize, like glutes, legs, and upper back.

Goal: Build lean muscle, enhance body shape, improve definition

Equipment: Full gym access

Frequency: 5 days / week

Duration: 60-75 minutes

Level: Intermediate (12-30 months of consistent training)

WEEKLY STRUCTURE

Monday: Quads & Shoulders

Tuesday: Back & Biceps

Wednesday: Chest & Triceps

Thursday: Rest / Mobility

Friday: Glutes, Hamstrings & Calves

Saturday: Back, Chest & Shoulders

Sunday: Rest

MONDAY – QUADS & SHOULDERS

Exercise	Sets × Reps
Back Squat	4 × 8
Leg Press	3 × 10
Dumbbell Shoulder Press	3 × 10
Lateral Raises	3 × 15
Leg Extension	2 × 12

TUESDAY – BACK & BICEPS

Exercise	Sets × Reps
Lat Pulldown	4 × 10
Seated Cable Row	3 × 12
One-Arm DB Row	3 × 10
Dumbbell Curl	3 × 12

WEDNESDAY – CHEST & TRICEPS

Exercise	Sets × Reps
Dumbbell Bench Press	4 × 10
Incline DB Press	3 × 10
Cable Fly	2 × 12
Triceps Pushdown	3 × 12

FRIDAY – GLUTES, HAMSTRINGS & CALVES

Exercise	Sets × Reps
Hip Thrust	4 × 10
Romanian Deadlift	3 × 8
Seated Leg Curl	3 × 12
Standing Calf Raises	4 × 15

SATURDAY – BACK, CHEST & SHOULDERS

Exercise	Sets × Reps
Assisted Pull-ups	3 × 8
Incline DB Press	3 × 10
Cable Row	3 × 12
Lateral Raises	3 × 15

PROGRESSION BASED ON FEMALE CYCLE

Training effort is adjusted across the cycle to support performance and recovery while still driving progress.

Cycle Phase	Days	Training Focus	How to Progress
Menstrual	1-5	Recovery & movement quality	Reduce load 10-20%, keep volume low
Follicular	6-13	Strength & progression	Increase reps or load (2-5%)
Ovulatory	14-16	Peak output	Heaviest lifts, best energy
Luteal	17-28	Control & volume	Maintain weights, slower tempo

5-DAY SPLIT WORKOUT – ADVANCED

This split is built for women who have years of training behind them and want precision, intensity, and refinement rather than basic progress. If you recover well, understand your body's signals, and can train hard most days of the week, this plan allows you to push performance while still staying in control.

What makes this split special is its focus on quality over chaos. Each session targets specific muscle groups with enough volume to stimulate growth, while smart scheduling and rest days prevent hormonal and nervous system burnout. It's designed for women who want to sculpt, strengthen, and fine-tune their physique.

Goal: Maximize muscle development, improve strength, refine physique

Equipment: Full gym access

Frequency: 5 days / week

Duration: 75-90 minutes

Level: Advanced (2+ years of consistent, structured training)

WEEKLY STRUCTURE

Monday: Quads & Shoulders

Tuesday: Back & Biceps

Wednesday: Chest & Triceps

Thursday: Rest / Mobility

Friday: Glutes & Hamstrings

Saturday: Back, Chest & Shoulders

Sunday: Rest

MONDAY – QUADS & SHOULDERS

Exercise	Sets × Reps
Back Squat	5 × 6
Hack Squat / Leg Press	4 × 10
Shoulder Press	4 × 8
Cable Lateral Raises	4 × 15

TUESDAY – BACK & BICEPS

Exercise	Sets × Reps
Pull-ups / Pulldown	4 × 8
Barbell Row	4 × 8
Seated Cable Row	3 × 10
EZ-Bar Curl	3 × 10

WEDNESDAY – CHEST & TRICEPS

Exercise	Sets × Reps
Barbell / DB Bench Press	4 × 8
Incline DB Press	3 × 8
Cable Fly	3 × 12
Skull Crushers	3 × 10

FRIDAY – GLUTES, HAMSTRINGS & CALVES

Exercise	Sets × Reps
Hip Thrust	5 × 8
Romanian Deadlift	4 × 8
Bulgarian Split Squat	3 × 10 / leg
Seated Calf Raises	4 × 15

SATURDAY – BACK, CHEST & SHOULDERS

Exercise	Sets × Reps
Pull-ups	3 × 8
Incline DB Press	3 × 10
Chest-Supported Row	3 × 10
Lateral Raises	4 × 15

PROGRESSION BASED ON FEMALE CYCLE

At the advanced level, aligning training with the menstrual cycle helps maintain performance while avoiding overreaching.

Cycle Phase	Days	Training Focus	How to Progress
Menstrual	1-5	Recovery & movement quality	Reduce load 15-25%, focus on technique
Follicular	6-13	Strength & overload	Increase load 2.5-5%, add intensity
Ovulatory	14-16	Peak performance	Heaviest lifts, PR attempts
Luteal	17-28	Volume & control	Maintain load, slow tempo, manage fatigue

CARDIO

CARDIO PROTOCOL - MEN

Level	Cardio Machine Settings
Beginner	Treadmill: 4-5 km/h, Incline 5-7, 15-20 min Bike: Resistance 4-6, 15-20 min Stairmaster: Level 4-6, 10-15 min
Intermediate	Treadmill: 5-6.5 km/h, Incline 8-10, 20-30 min Bike: Resistance 6-9, 20-30 min Stairmaster: Level 7-9, 20-25 min
Advanced	Treadmill: 6-8 km/h, Incline 10-15, 30-40 min Bike: Resistance 9-12, 30-40 min Stairmaster: Level 10-14, 25-30 min

CARDIO PROTOCOL - WOMEN

Level	Cardio Machine Settings
Beginner	Treadmill: 3-4.5 km/h, Incline 4-6, 15-20 min Bike: Resistance 3-5, 15-20 min Stairmaster: Level 3-5, 10-15 min
Intermediate	Treadmill: 4-6 km/h, Incline 6-10, 20-30 min Bike: Resistance 5-8, 20-30 min Stairmaster: Level 6-8, 15-25 min
Advanced	Treadmill: 5-7 km/h, Incline 10-14, 30-40 min Bike: Resistance 7-10, 25-35 min Stairmaster: Level 9-12, 20-30 min
